DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1, 9, 17, 25 and 33, drawn to a method for making an artificial Shiro of Matsutake, classified in class 435, subclass 390, for example.

II. Claims 2, 10, 18, 26 and 34, drawn to a method for making an artificial Shiro of Matsutake, classified in class 424, subclass 93.5, for example.

III. Claims 3, 11, 19, 27, 35, drawn to a method for making an artificial Shiro of Matsutake, classified in class 424, subclass 725, for example.

IV. Claims 12, 20, 28, 36, drawn to a method for making an artificial Shiro of Matsutake, classified in class 424, subclass 195.16, for example.

V. Claims 13, 21, 29, 37, drawn to a method for making an artificial Shiro of Matsutake, classified in class 424, subclass 93.1, for example.

VI. Claims 14, 22, 30, 38, drawn to a method for making an artificial Shiro of Matsutake, classified in class 435, subclass 254.1, for example.

VII. Claims 15, 23, 31, 39, drawn to a method for making an artificial Shiro of Matsutake, classified in class 435, subclass 383, for example.

VIII. Claims 16, 24, 32, 40, drawn to a method for making an artificial Shiro of Matsutake, classified in class 435, subclass 384, for example.

The inventions are distinct, each from the other because of the following reasons:

The inventions of the groups are directed to different inventions which are not connected in design, operation, and/or effect. These methods are independent since they are not disclosed as capable of use together, they have different modes of operation, they have different functions, and/or they have different effects. One would not have to practice the various methods at the same time to practice just one method alone.

The several inventions above are independent and distinct, each from the other. They have acquired a separate status in the art as a separate subject for inventive effect and require independent searches (as indicated by the different classification). The search for each of the above inventions is not co-extensive particularly with regard to the literature search. Further, a reference which would anticipate the invention of one group would not necessarily anticipate or even make obvious another group.

Because these inventions are distinct for the reasons given above and the search required for one group is not required for the other groups, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
